

MEMO: Caution When Using Your SSN In Lieu of TIN

Provider Identification numbers (i.e. TIN, FTIN, EIN) containing your personal Social Security Number (SSN) may present unnecessary risks to your identity. Please request new identification numbers if you are using your personal SSN. This will ensure your SSN is not exposed over the course of standard business practices and protect yourself from unnecessary harm.

To request new Provider Identification numbers, please visit www.irs.gov for more information or to contact your local IRS office.

*The term Coventry applies to all licensed entity affiliates and Health Plans.

Data Classification: Public Use
